Course Objectives

This course will cover the fundamentals of primate behaviour research and theory, including evolution, social dynamics, socio-ecology, dominance, aggression, kinship, sexual behaviour, reproductive strategies, cognition, communication and conservation. You will learn primate taxonomy and be able to apply these concepts to conceptualize and describe ecological and behavioural variation exhibited across primate groups.

Course Learning Outcomes

The Department of Anthropology and Archaeology is committed to student knowledge and skill development. Anth 311 draws on several different disciplines to examine such topics as evolutionary theory, primate social behaviour, conservation issues, and communication and cognition.

Course Learning Outcomes	PLO(s)*	Level(s)**

Learning outcome 2: Identify primate taxonomy and characteristics unique to each taxonomic group.	DK1, DK2, B1	1,2
Learning outcome 3: Distinguish between the different elements of primate socio-ecology, social groups, and factors that contribute to	DK1, B1	1,2

group variation, including male and female reproductive strategies and their influence on social organization.
