Anthropology 331 will explore sex and gender differences between males and females. Sex differences refer to the biological/innate differences between males and females. Gender to the socially and culturally produced ideas about differences between females and males. In the first third of the course, we will focus our investigations on the sex differences between males and females. This section will include discussions of evolutionary theory (e.g. sexual selection), primatology, and human origins research. In the rest of the course, we will examine masculine and feminine gender constructions through discussions of motherhood and fatherhood, gender differences in the public and private domain, the controversy over gender differences in learning, and examine gender stereotypes in the media. We will also look beyond the two-sex, two-gender system we have in North America and discuss gender variance in our society and around the world.

**Required Textbook:**

**Brettell, Caroline B. and Sargent, Carolyn F (eds). 2012. Gender in Cross-Cultural Perspective. Pearson-Prentice Hall: New Jersey. 6<sup>th</sup> edition**

**Online Readings**

Three others readings indicated in the outline are available online through the University of Calgary's Library. The readings are from the book **Sexual Selections**. You do not need to buy this book from the bookstore. The full reference for **Sexual Selections** is:

Zuk, Marlene, 2002. **Sexual Selections**. University of California Press: California

**Powerpoint Slides**

Powerpoint slides of the lecture notes will be posted on Blackboard prior to each class. Students are encouraged to print these notes and bring them to class, as they should assist in note taking. The posted notes do not encompass all of the material presented in class, and do not include videos or class discussions. As such, they should not be considered sufficient in themselves to prepare for the examinations. Although related and sometimes overlapping, the material in the textbook is not tightly integrated with the lectures. These should be considered two separate sets of information, both to be mastered for the examinations.
