Course Description

This course will examine the clinical, epidemiological, cultural, social, psychological, political, economic, and public policy dimensions of HIV/AIDS on a global level from an anthropological perspective. It will use a holistic and cross-cultural approach to explore how gender, class, sexual orientation, nationality, and ethnicity impact individuals living with HIV/AIDS focusing on social stigma, discrimination, economic, and political issues within and between global populations. The meaning and importance of HIV/AIDS will also be discussed.
