COURSE DESCRIPTION
In this course, we will address research methods in the study of primate social systems. The laboratory component consists of instruction in observational methodology and exercises. We will take students through the various stages of the research process, including research topics and hypotheses, methodology, data collection, analysis, and presentation. The aim is to help students develop the skills to conduct advanced, independent research in primatology, whether in captivity or in a field environment.

COURSE LEARNING OUTCOMES
At the end of this course, students should be able to:
1. Identify general primate anatomical, life history and behavioural characteristics, major groupings in the primate evolutionary tree, categories of primate social systems, primary behavioural strategies to enhance fitness in primates.
2. Recall and describe the theory behind behavioural observation methodology, behavioural observation and ecological methods used in primate studies, components of the scientific method.
3. Carry out behavioural observation techniques to collect original data on captive primates.
4. Implement basic descriptive statistical analyses using observational data.
5. Test hypotheses using observational data.
6. Apply standard practices in scientific writing in a report.
7. **Produce** a scientific report based on behavioural observation data.

Students are expected to attend lectures and to participate in all assigned exercises. Some of the work for this course will be conducted at the Calgary Zoo, and attendance for scheduled labs is mandatory. Accommodation will be made for the transportation time of students with courses held on campus immediately prior to lab hours. Students are responsible for materials covered in the textbooks and lectures. Classroom materials missed due to absenteeism are the sole responsibility of the students.

There is no Registrar scheduled final exam for this course. Tests are multiple choice and short answer format. Only basic calculators and pens/pencils may be used for tests. If you miss a required component of the course, you must contact the instructor in writing (e-mail) within 24 hours to discuss options to submit and/or make-up for that component. Assignments submitted after the deadline may be penalized with the loss of a grade (e.g.: A- to B+) for each day late. If you foresee a missed test or assignment due to a personal scheduling conflict, you must contact the instructor at least two weeks prior to the due date. In these cases, make-ups and extensions are at the discretion of the instructor.

EXPECTATIONS FOR WRITING

All written assignments (including, to a lesser extent, written exam responses) will be assessed at least partly on writing skills. Writing skills include not only surface correctness (grammar, punctuation, sentence structure, etc.) but also general clarity and organization. Sources used in research papers must be properly documented. If you need help with your writing, you may use the writing support services in the Learning Commons. For further information, please refer to the official online University of Calgary Calendar, Academic Regulations, E. Course Information, E.2: Writing Across the Curriculum: http://www.ucalgary.ca/pubs/calendar/current/e-2.html.

Sep 16-Dec 2 – Regular Laboratory Meetings at the Calgary Zoo  
We will meet weekly on Thursdays at the Zoo to discuss lab assignments, provide help and 
feedback, etc. The instructor and/or teaching assistant will be present at these times. There will 
some weeks with no scheduled labs, generally the week prior to the deadline for each lab 
assignment (currently scheduled for Sep 30, Oct 28, Dec 2, Dec 9, subject to change). You must 
attend scheduled labs to collect data for assignments. However, if you wish to collect data 
beyond the required minimum observation time, you are free to work independently on 
assignments at any other time during Zoo business hours.

Oct 7 – Assignment #1 due. This assignment is based on Exercise 4 in the Teichroeb et al. 
workbook. Further instructions will be provided in the Sep 16 laboratory.

Nov 4 – Assignment #2 due. This assignment is based on Exercise 6 in the Teichroeb et al.

Please submit all assignments electronically the dropbox in D2L. Assignments may be submitted 
in Word or PDF format. Assignments should have a file name as follows: “First Name Last Name 
Assignment Number” (e.g., Alex Smith Assignment 2). Assignments must be submitted by 11:59 
pm on their due date. It is the student's responsibility to keep a copy of each submitted 
assignment and to ensure that the proper version is submitted.
